

INSTABANK ASA

INTERIM REPORT Q1 2019

INTERIM REPORT Q1 2019

Key highlights & developments:

- ★ Net loan growth of 123 MNOK/ 5 %. Finland performed well with a net loan growth of 148 MNOK, while net loans in Norway decreased by 50 MNOK and net loans in Sweden grew by 25 MNOK
- ★ Q1 net profit of 4.4 MNOK, weakened by administrative cost related to strategic initiatives and a one-off increase in loan loss provisions
- ★ Launched Instapay MasterCard credit card, initially targeted to POS finance customers
- ★ New share issue to existing shareholders with gross proceeds of 42.8 MNOK

We think like you.

INTERIM REPORT Q1 2019

About Instabank ASA

Instabank is a Norwegian digital bank with offices in Oslo, Norway. Instabank ASA was granted a banking license by The Financial Supervisory Authority of Norway (Finanstilsynet) on September 19th, 2016. On September 23rd, 2016, the bank opened for business.

Instabank has a vision to deliver the best user experience in our market and to simplify banking services. We aim to help our customers achieve both large and small ambitions. Our market promise is: *"Vi tenker ikke som en bank, vi tenker som deg"* (we don't think like a bank, we think like you).

The ability to quickly grasp opportunities, make fast decisions and immediately implement changes runs consistently through the bank's platform and culture. At the end of Q1, Instabank had 30 full-time and 8 part-time employees.

Instabank operates in Norway, Finland and, from Q4/18, Sweden offering competitive savings,

insurance, and unsecured loan products to consumers who qualify after a credit evaluation. The loan product is designed to be highly customisable in order to match the consumer's preferences. Customers are offered a payment plan that ranges from 3 to 5 years, or alternatively a flexible credit facility.

The bank's products and services are distributed primarily through the bank's website, retail partners and via agents. At the end of Q1, the bank had distribution through 20 agents, various retail partners as well as through our own website and marketing mix.

Instabank is a member of "Bankenes Sikringsfond", which secures all deposits up to two million kroner.

Instabank is primarily owned by Norwegian investors. By the end of Q1, Kistefos AS was the bank's largest shareholder owning 24.9 %. There were no other individual shareholders holding more than 10% of the shares.

Operational developments

The bank soft-launched loan products in the Swedish market through a cross-border operation late in Q4 2018 and has fine-tuned the credit risk model and pricing on low paid-out volume during Q1 2019 to limit credit risk and optimise margins in a highly competitive market.

Deposits were launched in Sweden in Q1 19 at an attractive margin compared to the deposit rate offered in Norway.

The Finnish market is still developing very well for Instabank and contributed with a net loan growth of 148 MNOK in Q1 19. Finland is the most profitable market for Instabank, offering attractive margins compared to the Norwegian market, both when it comes to loan yield and funding cost. In Q1 19 deposits in Finland grew by 210 MNOK to 611 MNOK at a deposit rate more than 1 % point lower than in Norway.

The bank has entered into a forward flow agreement with Axactor for the monthly sale of the bank's non-performing loans in Finland. The agreement came into effect from March 19.

In Norway the bank has experienced a decrease in loan balance growth over the past quarters and in Q1 19 the bank experienced a decrease in loan balance for the first time of - 50 MNOK. The decrease was a result of the bank focusing on volume growth outside of Norway, where more attractive margins are attainable. In Norway, the Point of Sales (POS) financing solution continues to develop very well, attracting a large number of small-ticket customers representing a significant upsell potential to an attractive segment.

Instabank launched the Instapay MasterCard credit card as a payment instrument on top of the flexible loan product. Initially, Instapay is offered to POS finance customers at Skeidar as an option in the application process and will be offered to other customer segments as a standalone credit card during Q2 19.

Balance Sheet

Net loan balance increased by 123 MNOK/ 5 % to 2 605 MNOK by the end of Q1 19, down from a growth of 271 MNOK in the previous quarter mainly due to a decrease in net loan balance in Norway. Finland represented 31 % of total loan balance by the end of Q1 19, up from 26 % by the end of the previous quarter.

Net loans growth MNOK

Deposits from customers decreased by 81 MNOK in Q1 19, down from a 285 MNOK increase in the previous quarter. The deposits/ net loans ratio decreased to 106 % from 114 % by the end of the previous quarter. The bank has succeeded in shifting deposit volume from a higher deposit rate in Norway at 1.93 % to a more attractive deposit rate in Finland at 0.80 %. By the end of Q1 19 the bank had 2.751 MNOK in deposits of which 22 % was in Finland, up from 14 % by the end of the previous quarter.

Total assets by the end of Q1 19 were 3 379 MNOK.

The total capital ratio for the bank was 23.7 % by the end of Q1 19 and common equity Tier 1 Capital ratio was 21.0 %.

The bank had a new share issue of 42.8 MNOK in Q1 19. For information relating to capital requirements and liquidity coverage ratio, refer to the notes.

At the end of Q1 19, the bank had a total of 32 826 customers, of which 26 144 were loan customers and 6 682 were deposit customers with a balance.

Profit and loss

Interest income increased by 3.3 MNOK from the previous quarter to 73.5 MNOK in Q1 19 as a result of loan balance growth. Interest expenses came in at 13.5 MNOK, 1.0 MNOK lower than the previous quarter as a result of a shift in the deposit mix between the countries in favour of Finland, as well as a decrease in the total deposit volume. As a result of declined deposit rates and a decrease in surplus liquidity, the net interest margin increased by 0.11 % points to 9.35 %.

Total income increased by 4.0 MNOK to 58.3 MNOK, positively affected by a liquidity yield of 1.63 %, up from 0.62 % in the previous quarter and negatively affected by an increase in commission expenses.

Total operating expenses were 31.9 MNOK in Q1 19, up 5.5 MNOK from the previous quarter, but only 1.5 MNOK higher than in Q3 18. Administrative costs increased 3.0 MNOK from the previous quarter, partly related to adding operational costs for the Swedish operation and partly related to 1.5 MNOK in one-off advisory costs.

Losses on loans came in at 21.9 MNOK or 3.4 % of gross loan balance, up from 17.5 MNOK/ 2.9 % in the previous quarter. The bank entered into a forward flow agreement with Axactor for Finland in the quarter, leading to a reassessment of the loan loss provision ratio for non-performing loans in Finland, resulting in a one-off adjustment of 5 MNOK.

Net profit was 4.4 MNOK and net profit after tax was 3.3 MNOK, down from 8.3 MNOK in the previous quarter.

Outlook

There is still considerable focus on developments in Norwegian household borrowing and especially when it comes to consumer loans. The new consumer finance by-law was announced on the 12th of February this year and the banks must adopt the regulations no later than the 15th of May 2019.

The authorities have been working for five years to put in place a debt register in Norway, and by the end of June this year it will finally be operative. The debt register is expected to reduce the number of fraudulent applications, where loan applicants don't disclose all of their debt, and is expected to lead to more informed and accurate credit assessments of loan applicants.

Presence in three countries gives Instabank the strategic opportunity to focus where resources and volumes can be optimised to achieve profitable growth. In Norway, Instabank expects competition to continue to increase, lately as a result of larger full-service banks scaling up their consumer loan sales efforts causing some pressure on interest margins. Consequently, the most important markets for Instabank going forward are expected to be Finland and Sweden.

In December 2018, Instabank announced that it will apply for a Swedish banking license. The bank also explores other alternatives for a Swedish domicile than applying for a license.

The bank's liquidity situation and capital situation are expected to remain at a satisfactory level in the future. It should be noted that there is typically uncertainty related to assessments of future conditions. The Instabank team will continuously evaluate new products and distribution channels that can supplement the bank's current platform, but the bank's main focus will be growth on existing products and solutions as well as entering new countries in the years to come to leverage the scalable platform.

The bank expects FSA (Finanstilsynet) will conclude the Pilar 2 requirement for the bank in Q2/19.

Other information

There has been a limited review of the accounts in accordance with ISRE 2410 as of 31.03.19 by the bank's auditors and the result after tax are added to retained earnings in full.
